\$3,000 Scholarship Opportunity

ENGINEERING STUDENTS

Paying for college can be stressful, but the Wire Reinforcement Institute (WRI) is providing some concrete support. WRI's Education Foundation is sponsoring scholarships ranging from \$1,500 to \$3,000 for beginning and continuing engineering students seeking undergraduate or graduate degrees in civil or structural engineering. As the concrete construction industry's leading advocate for structural welded wire reinforcement (SWWR), WRI knows the value of a well reinforced foundation, whether it's to support a building or build a career.

For scholarship details and application materials, please visit our website at www.wirereinforcementinstitute.org.
